

BLOCKCHAIN
FACTORY

Disclaimer for Blockchain Factory

The management of Integrity and Blockchain Nodes falls under a distinct Distributed Systems Framework and isn't solely under the purview of Blockchain Factory. Therefore, any value ascertained from Integrity Nodes and Integrity Digital Rewards should not be linked to the success or failure of Blockchain Factory.

Responsibility for Blockchain Factory rewards

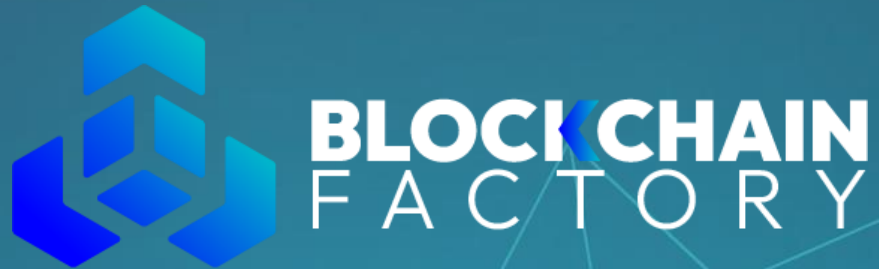

Neither Blockchain Factory nor Integrity partake in the selling of tokens or digital rewards. The blockchain of Integrity, which is overseen by the owners of Integrity's Nodes, independently controls the distribution of Integrity's digital rewards. These digital rewards are granted in exchange for tasks and activities carried out on the Integrity blockchain. These rewards are designed to be used within the Integrity marketplace when acquiring Integrity goods and services. The digital reward cannot be considered as an investment product and it holds no value outside of the Integrity marketplace. The owners of Integrity Nodes should not anticipate gaining any value from the digital reward beyond its application within the Integrity platform.

Forward-Looking Statement of Blockchain Factory

This document might contain forward-looking statements fraught with substantial risks and uncertainties. These forward-looking statements reference plans, strategies, perspectives, and expectations related to business, operations, markets, risks, and other similar areas. Unexpected future events may transpire that we cannot exactly foresee or manage. Any forward-looking statement contained herein is only applicable as of the date it was made. Circumstances or occurrences that could lead to a variation in our actual results may emerge periodically and we are unable to predict all of them. We do not plan to update or publicly amend any forward-looking statements, unless mandated by law.

Educational Disclaimer:

The viewpoints expressed in this material do not necessarily align with those of Truth DAO. The information provided is strictly for educational aims and should not be construed as financial advice. We highly encourage individuals to perform their own investigation and exercise independent discretion before making any financial decisions. Blockchain Factory bears no accountability for any action taken based on the information provided.

We specialize in providing innovative solutions using blockchain technology, which empowers companies to fully leverage the potential of Web3 era and technology. By integrating tokenization, smart contracts, NFTs, and decentralized applications (dApps), we assist organizations in optimizing their operations and enhancing customer experience within a decentralized ecosystem.

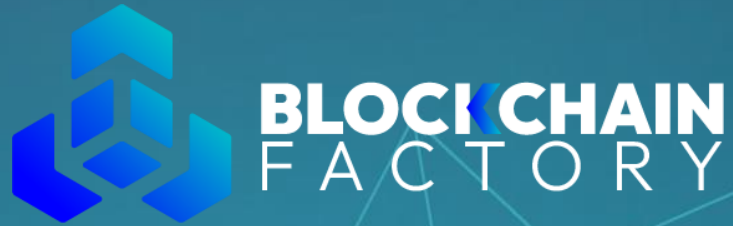

Mission:

Our mission is to be the preferred partner for businesses seeking to tap into the power of blockchain technology, promoting innovation, trust, and transparency across all sectors.

Vision:

We aim to be a leading player in the blockchain field, collaborating with companies globally, while serving as a prime knowledge resource for communities focused on blockchain, tokenization, and their advantages.

Mission: to assist businesses in transitioning from Web2 to Web3.

Web2 Commerce → Web3 Commerce

In order to become a trusted partner for businesses that adopt Web3 technology, we support innovation, trust, and transparency in various sectors.

Chad Barron

Alan Vey

What is Blockchain?

Centralized

Managed by a corporation.
Keeps user's assets.
Subject to regulations.
Limited transparency.
Easier to control.
May experience delays.
Typically higher liquidity.
Susceptible to attacks.

Decentralized

Without centralized authority.
Users control their own resources.
Less regulated.
Highly transparent.
May be complex.
Typically quick.
Alters based on user interaction.
Reliant on the security of the code.

BLOCKCHAIN

TECHNOLOGY ENSURING
SECURE DATA AND PAYMENTS

What can be verified using Blockchain?

- ✓ Transaction history.
- ✓ Asset ownership.
- ✓ Smart contracts.
- ✓ Identity verification.
- ✓ Token delivery.
- ✓ Origin.
- ✓ Voting results.
- ✓ Compliance record.
- ✓ Data integrity.
- ✓ Transaction fees.

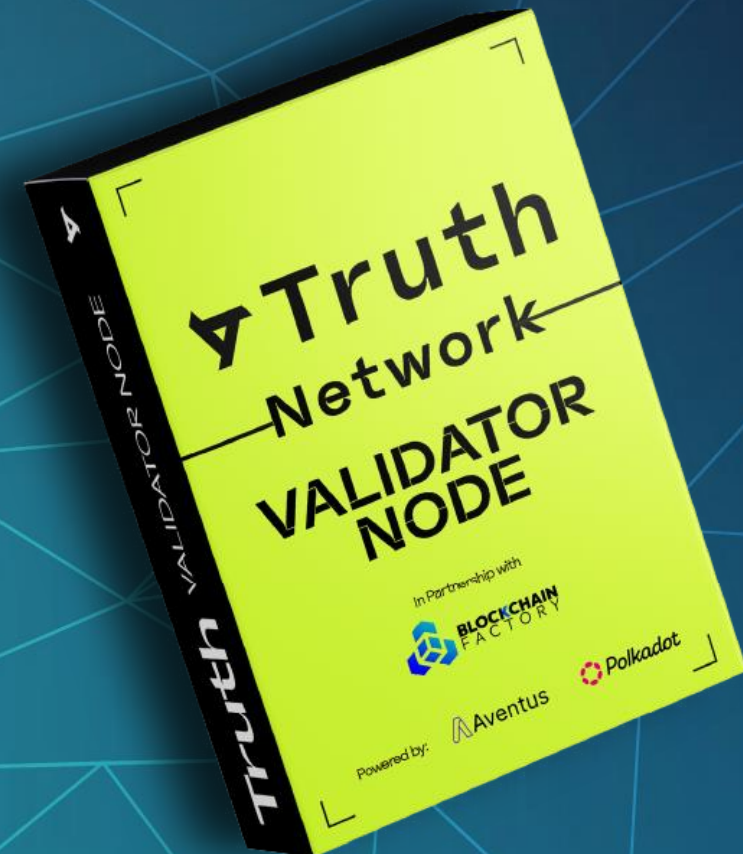

What is a Validator Node in Blockchain?

A Node is any device (computer, physical or virtual server) that participates in the blockchain network.

A Validator Node is a specific type of node that is responsible for confirming transactions and adding them to the blockchain.

Validator Nodes participate in consensus mechanisms (such as proof of stake) to ensure that transactions are legitimate before they are recorded.

They often earn rewards for their work in validating transactions and maintaining the network's security.

Truth

This is the essential utility token for a decentralized validation network. It is designed to encourage transparency, equity, and trust in prediction markets. TRUTH inspires a worldwide community of validators to work together in securing results, guaranteeing accuracy and integrity on a large scale.

It is the only token that powers a decentralized network specifically designed to provide verifiable results and foster trust in global prediction markets.

Polymarket

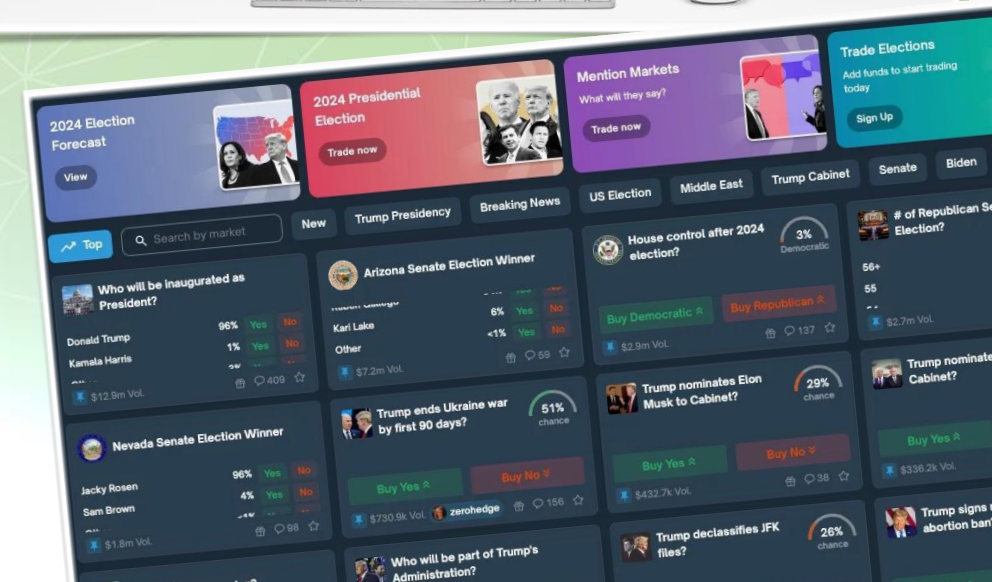

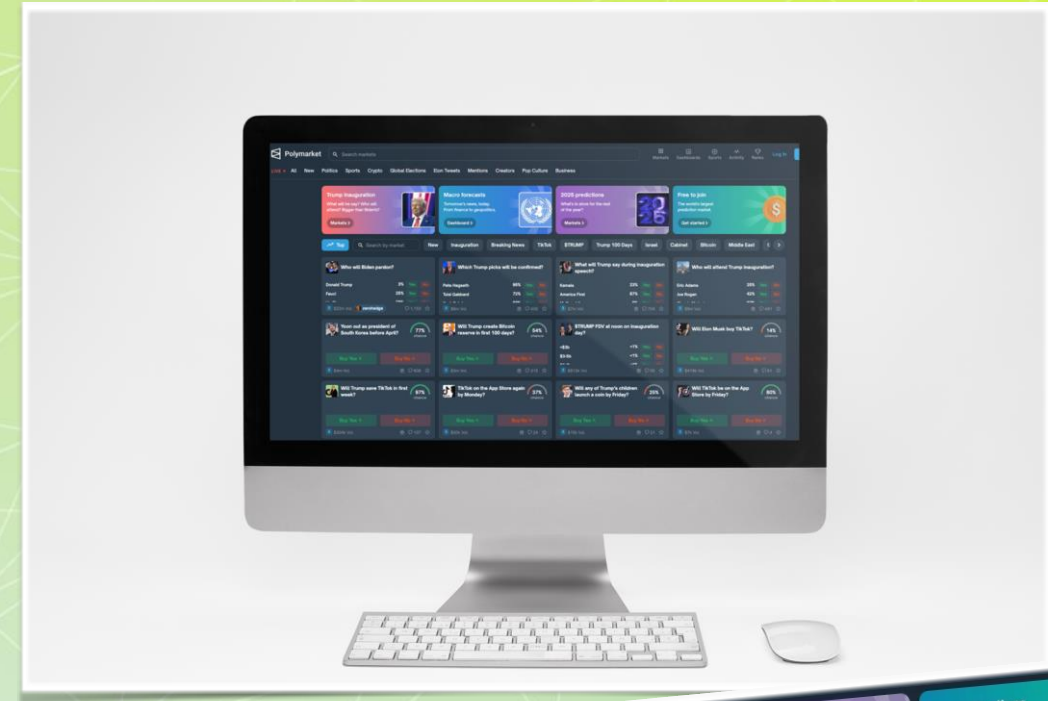

Kalshi

What is Polymarket?

Polymarket is a decentralized information market platform that allows users to speculate on the outcomes of real-world events by buying and selling shares in different possible outcomes. These events cover a wide range of topics, such as politics, sports, finance, and culture.

Australia's cricketers retain Women's Ashes after fourth straight win in the series against England

It has taken just nine days for Australia's cricketers to retain the Women's Ashes. The Australians won a fourth straight game in the multi-format series with a 57-run victory in the first of the three T20s between the rivals.
